10. General Diagnostic Table

Symptom	Problem parts
Starter does not rotate when select lever is in "P" or "N"; starter rotates when select lever is in "R", "D", "3" or "2".	 1) Inhibitor switch 2) Select cable 3) Select lever 4) Starter motor and harness
Abnormal noise when select lever is in "P" or "N".	 Strainer Duty solenoid C Oil pump Drive plate ATF level too high or too low
Hissing noise occurs during standing start.	 Strainer ATF level too high or too low
Noise occurs while driving in "D1".	 Final gear Planetary gear
Noise occurs while driving in "D2".	3) Reduction gear4) Differential gear oil level too high or too low
Noise occurs while driving in "D3".	 Final gear Low & reverse brake Reduction gear Differential gear oil level too high or too low
Noise occurs while driving in "D4".	 Final gear Low & reverse brake Planetary gear Reduction gear Differential gear oil level too high or too low
Engine stalls while shifting from one range to another.	 Control valve Lock-up damper Engine performance
Vehicle moves when select lever is in "N".	 Control module Inhibitor switch Forward clutch
Shock occurs when select lever is moved from "N" to "D".	 Control module Accumulator ("N" to "D") Control valve ATF deterioration Dropping resistor
Excessive time lag occurs when select lever is moved from "N" to "D".	 Control module Control valve Forward clutch Duty solenoid A Forward clutch seal ring Front gasket transmission case
Shock occurs when select lever is moved from "N" to "R".	 Control module Accumulator (4A) Control valve ATF deterioration Dropping resistor
Excessive time lag occurs when select lever is moved from "N" to "R".	 Control valve Low & reverse clutch Reverse clutch Duty solenoid A Forward clutch seal ring Front gasket transmission case
Vehicle does not start in any shift range (engine stalls).	 Parking brake mechanism Planetary gear

Symptom	Problem parts
Oympion	1) Strainer
	2) Duty solenoid A
	3) Control valve
	4) Drive pinion
	5) Hypoid gear
	6) Axle shaft
Vahiala daga not start in any shift range (anging rowing up)	7) Differential gear
Vehicle does not start in any shift range (engine revving up).	8) Oil pump
	9) Input shaft
	10) Output shaft
	11) Planetary gear
	12) Drive plate
	13) ATF level too low
	14) Front gasket transmission case
	1) Select cable
	2) Select lever
Vehicle does not start in "R" range only (engine revving up).	3) Control valve
	4) Low & reverse clutch
	5) Reverse clutch
	1) Forward clutch
	/
Vehicle does not start in "R" range only (engine stalls).	2) Band brake
	3) Planetary gear
	4) Parking brake mechanism
Vehicle does not start in "D", "3" or "2" range only (engine rev-	1) Forward clutch
ving up).	2) One-way clutch (1-2)
Vehicle does not start in "D", "3", "2" or "1" range only (engine	
revving up).	1) Forward clutch
• • •	
Vehicle does not start in "D", "3", "2" or "1" range only (engine	1) Reverse clutch
stalls).	
Vehicle starts in "R" range only (engine revving up).	1) Control valve
	1) Control valve
	2) Forward clutch
Acceleration during standing starts is poor (high stall rpm).	3) Reverse clutch
	4) ATF level too low
	5) Front gasket transmission case
	1) Oil pump
Acceleration during standing starts is poor (low stall rpm).	2) Torque converter one-way clutch
	3) Engine performance
	1) Control module
	2) Control valve
Acceleration is poor when select lever is in "D", "3" or "2"	3) High clutch
range (normal stall rpm).	4) Brake band
	5) Planetary gear
	1) Control module
Acceleration is near when called lower is in "P" (normal stall	2) Overrunning clutch
Acceleration is poor when select lever is in "R" (normal stall	3) High clutch
rpm).	4) Brake band
	5) Planetary gear
	1) Control module
No shift occurs from 1st to 2nd gear.	2) Vehicle speed sensor 1
	3) Vehicle speed sensor 2
	4) Throttle position sensor
	5) Shift solenoid 1
	6) Shift solenoid 2
	7) Control valve
	8) Brake band

3-2 [T1000] AUTOMATIC TRANSMISSION AND DIFFERENTIAL 10. General Diagnostic Table

Symptom	Problem parts
Symptom	Problem parts 1) Control module
No shift occurs from 2nd to 3rd gear.	2) Control valve3) High clutch
No shift occurs from 3rd to 4th gear.	 4) One-way clutch (3-4) 1) Control module 2) Accumulator (3R) 3) ATF temperature sensor 4) Control valve 5) Band brake
Engine brake is not effected when select lever is in "3" range.	 1) Inhibitor switch 2) Control module 3) Throttle position sensor 4) Control valve 5) Shift solenoid 3
Engine brake is not effected when select lever is in "3" or "2" range.	 Control valve Overrunning clutch
Engine brake is not effected when select lever is in "1" range.	 Control valve Low & reverse brake clutch
Shift characteristics are erroneous.	 1) Inhibitor switch 2) Control module 3) Vehicle speed sensor 1 4) Vehicle speed sensor 2 5) Throttle position sensor 6) Control valve
No lock-up occurs.	 Control module Throttle position sensor ATF temperature sensor Control valve Lock-up facing Engine speed signal
Parking brake is not effected.	1) Select cable
Shift lever cannot be moved or is hard to move from "P" range.	2) Select lever 3) Parking mechanism
ATF spurts out.	1) ATF level too high
Differential oil spurts out.	1) Differential gear oil too high
Differential oil level changes excessively.	 Seal pipe Double oil seal
Odor is produced from ATF supply pipe.	 Transfer clutch Forward clutch Overrunning clutch High clutch Band brake Low & reverse clutch Reverse clutch Lock-up facing ATF deterioration
Shock occurs from 1st to 2nd gear.	 Control module Throttle position sensor Accumulator (2A) ATF temperature sensor Duty solenoid A Control valve Band brake ATF deterioration Engine performance Dropping resistor

Cumpton	Droblem porte
Symptom	Problem parts 1) Control module
Slippage occurs from 1st to 2nd gear.	 Control module Throttle position sensor Accumulator (2A) ATF temperature sensor Duty solenoid A Control valve Band brake
Shock occurs from 2nd to 3rd gear.	 Control module Throttle position sensor Accumulator (3R) ATF temperature sensor Duty solenoid A Control valve High clutch Band brake ATF deterioration Engine performance Dropping resistor
Slippage occurs from 2nd to 3rd gear.	 Control module Throttle position sensor Accumulator (3R) ATF temperature sensor Duty solenoid A Control valve High clutch Band brake
Shock occurs from 3rd to 4th gear.	 Control module Throttle position sensor Accumulator ATF temperature sensor Duty solenoid A Control valve Overrunning clutch Band brake ATF deterioration Engine performance
Slippage occurs from 3rd to 4th gear.	 Control module Throttle position sensor Accumulator ATF temperature sensor Duty solenoid A Control valve Band brake
Shock occurs when select lever is moved from "3" to "2" range.	 Control module Throttle position sensor ATF temperature sensor Duty solenoid A Control valve Overrunning clutch Band brake ATF deterioration
Shock occurs when select lever is moved from "D" to "1" range.	 Control module Throttle position sensor ATF temperature sensor Duty solenoid A Control valve ATF deterioration Low & reverse brake

3-2 [T1000] AUTOMATIC TRANSMISSION AND DIFFERENTIAL 10. General Diagnostic Table

Symptom	Problem parts
- Cympioni	1) Control module
	2) Throttle position sensor3) ATF temperature sensor
Shock occurs when select lever is moved from "2" to "1"	
range.	4) Duty solenoid A
	5) Control valve
	6) Low & reverse clutch
	7) ATF deterioration
	1) Control module
	2) Throttle position sensor
Shock occurs when accelerator pedal is released at medium speeds.	3) ATF temperature sensor
	4) Duty solenoid A
	5) Control valve
	6) Lock-up damper
	7) Engine performance
	1) Control module
Vibration appure during straight forward apprection	2) Duty solenoid B
Vibration occurs during straight-forward operation.	3) Lock-up facing
	4) Lock-up damper
	1) Control module
	2) Vehicle speed sensor 1
	3) Vehicle speed sensor 2
	4) Throttle position sensor
Vibration occurs during turns (tight corner "braking" phenom-	5) ATF temperature sensor
enon).	6) Transfer clutch
	7) Transfer valve
	8) Duty solenoid C
	9) ATF deterioration
	1) Control module
	2) Vehicle speed sensor 2
	3) FWD switch
	4) Throttle position sensor
	5) ATF temperature sensor
Front wheel slippage occurs during standing starts.	6) Control valve
i font moor enppage coole daning standing state.	7) Transfer clutch
	8) Transfer valve
	9) Transfer pipe
	10) Duty solenoid C
	11) Transfer clutch hub
	1) Control module
	2) FWD switch
Vehicle is not set in FWD mode.	3) Transfer clutch
	4) Transfer valve
	5) Duty solenoid C
	1) Select cable
Select lever is hard to move.	2) Select lever
	3) Detent spring
	4) Manual plate
Select lever is too high to move (unreasonable resistance).	1) Detent spring
	2) Manual plate
	1) Select cable
Select lever slips out of operation during acceleration or while driving on rough terrain.	2) Select lever
	3) Detent spring
	4) Manual plate
